CHINA LOGISTICS CLUB

About China Logistics Club

The main activity of the China Logistics Club Group is to conduct regular freight forwarders and logistic conferences and seminars in various cities in China, Europe and Africa respectively. Besides being highly industry informative and educational, the conferences aim to bring together overseas freight companies with local Chinese Overseas counterparts. During the course of the conference and a series of One2One meeting sessions, partnerships can be forged and agents found.

The conferences are held in different cities across China / Europe / Africa to allow for overseas companies to target specific areas of interest where agents or partners are needed. Likewise, CLC seeks to attract a variety of overseas logistics companies from different fields and geographical locations in order to create a diversified and beneficial network for all members and conference participants. CLC is also the first network to make it mandatory for all members to be covered by GLS the professional underwritten Freight Payment Protection.

CHINA LOGISTICS CLUB

About African Logistics Club

African Logistics Club is a subsidiary of China Logistics Club that was started to help our members to develop more business with Africa.

The goal is to hold regular conferences in Africa and bring delegations of our Chinese members to Africa. We are regularly bringing members from Africa to our conferences in China, but visas for China can be a challenge, therefore arranging more conference in Africa is the long term goal.

We plan to hold a conference in Nairobi and Lagos in the near future..

With the new mandatory Global Logistics Shield (www.gshield.com) freight payment protection, it makes the African Logistics Club the safest network and our members know that all members that are protected and have gone through a thorough due diligence and are companies that will always pay on time. Membership fee is still only US\$399 per year and gives access to all the Clubs with the exception of the Project network. We are expanding the cover of members that are protected across the African continent.

Members at the ECL event in Birmingham in 2010

and ALC members in Xiamen in 2010

About European Logistics Club

European Logistics Club was formed on the back of the success of China Logistics Club which was established in 2005 and quickly grew into an association of over 400 Small & Medium Enterprise (SME) freight forwarders and logistics companies interested in developing trade to and from China.

The main activity of the European Logistics Club is to conduct regular conferences in different cities throughout Europe. These conferences are attended by overseas members as well as local freight forwarders and provide a forum on which to establish new business relationships. Each club, which also includes Africa Logistics Club, Americas Logistics Club plus project and relocation divisions which all work together to promote and forge networking opportunities between their members.

ECL has already had 2 conferences/exhibitions in Birmingham and expect to be there again in April 2012. We will have our own Pavilion. In 2012 we hope to bring a larger delegation from our members in China beside the delegation from Africa

and Americas.

Membership fees for any of the clubs are US\$399 and this allows members to attend any of the club's conferences and have access to the members.

About Americas Logistics Club

Americas Logistics Club (AMLC) covers both North and South America. This club is managed from Hong Kong and is supervised by our first GLS Freight Payment Protected Company, Sky Cargo S.R.L. in Buenos Aires in Argentina.

The reason to start this club is to find top quality companies in the Americas and create a club where all the members from around the world will be able to develop more business with financially reliable members that are all GLS protected.

We expect in 2012 to be able to arrange for one yearly conference in the Americas and bring in a delegation from China, Africa and Europe who want to visit and meet some of our Americas members.

The Americas is an area with 900 million people can be challenging region where our Freight Payment Protection is the key to the success so any of our members can safely work with any member from the Americas.

We believe the AMLC will become one of our fastest growing regions for the China Logistics Club Group.

Plans are currently been drawn up for a conference in 2012 in Latin America.

CHINA LOGISTICS CLUB

About Indian Logistics Club

We have started Indian Logistics Club (ILC) for top quality GLS protected Indian companies and arrange for a yearly conference in India with the first conference in 2012.

The Indian Logistics Club (ILC) is for companies that have been invited on. We will soon come up with the dedicated website of ILC at: <http://www.indianlogisticsclub.com/>.

CHINA LOGISTICS CLUB

China Logistics Club Project Division

“The project division of China Logistics Club was created to develop an ‘In-House’ project expertise for our ordinary member who needs help with projects from and to China.”

We have already over 80 members worldwide and access to the project membership list is available to all China Logistics Club, European Logistics Club, Central Asian Logistics Club, African Logistics Club and American Logistics Club.

In every conference either in China or elsewhere we will hold a special project meeting for project members to network and for our ordinary members to meet project members if they need help with a project. We will also hold special project seminars attached to our conference, as we did in Ningbo, with the assistance of a project member, we had seminar regarding lashing and securing of project cargo.

China Logistics Club Project is a separate company that will compete with other project

networks, but we believe we will deliver true value for our members with a continuous flow of sales leads, regular meetings at CLC conferences. The annual membership to belong to China Logistics Club | Project is USD 1500.

CHINA LOGISTICS CLUB

About China Logistics Club Relocation Division

China Logistics Club has launched a Relocation Service Division as more of our members are involved in the relocation of household goods. As the CLC aims to be a complete provider to all its members, it is a natural extension for us to find provisions to assist our associates.

For only an annual fee of **US\$399** logistics companies gain access to all our divisions and clubs (with the exception of China Logistics Club | Project) without having to pay extra membership fees for different networks.

The Relocation business has also changed. In the past, relocation companies were not involved in freight forwarding or logistics; however as the margins become thinner and thinner it was no longer possible to hibernate during the 'off' season. Most relocation companies, through necessity, have slowly move into the freight forwarding business hence the China Logistics Club is a perfect home for these companies.

China Logistics Club holds between 3-6 conferences per year. At each conference we arrange for special relocation meetings that will be chaired by the relocation partner.

The next China Logistics Club conference is in Hong Kong and it will be a good opportunity to meet with fellow relocation companies who are members from the China, African or European logistics Clubs.

From the 1st January 2011, the China Logistics Club relocation division will be the first network in the world that has a professional underwritten freight payment protection. We all want to work with partners that are financially safe and we now have this option available to all our members.

We look forward to seeing you there.

Global Logistics Shield

GLS FREIGHT FORWARDER INSOLVENCY INSURANCE

GLOBAL
LOGISTICS
SHIELD

Global Logistics Shield (GLS) is a Hong Kong incorporated legal entity offering freight payment protection services for **forwarders and logistics providers**.

GLS supports national and international freight forwarder networks and their members, by establishing a status of credibility of GLS participants, and thereby providing financial security to creditors of protected participants

This company is **Global Logistics Shield**, please see: www.glshield.com which will run and manage the freight protection plan on behalf of China Logistics Club and other networks.

The GLS Freight Protection Plan consists of two key components:

- *underwritten* participant insolvency assurance for debtors
- The GLS Timely Freight Payment Monitoring & Alerting Scheme

What also makes this plan very unique to any other freight protection schemes or trade credit assurance is that you will **INSURE YOURSELF** and you will only be covered when you work with fellow network members that are also insured. This will give you a marketing tool to tell overseas agents that you are a solid and financially sound company that has gone through a thorough due diligence, are monitored independently every month and that you pay on the agreed 30 days payment terms. It will also allow you to tell an overseas agent that you are not **ALLOWED** to give them credit before they have insured

themselves. This is surely a great tool to avoid taking any unnecessary risk with a new agent.

This cost of scheme is USD500 plus a USD375 participant's assessment fee. GLS Timely Freight Payment Monitoring & Alerting Scheme fee: USD 100 per year. We know that this plan is comprehensive and assured compared to "protection" offered by some networks. Professional and financially sound freight forwarders will appreciate the peace of mind participating knowing they can concentrate on developing new business rather than spending time chasing slow paying or defaulting agents.
